

****Job Title:** Data Analyst**

****Company:** Tesla**

****Location:** Fremont, CA**

****About the Role:****

We're looking for an exceptional Data Analyst to join Tesla's Data and Analytics team. You will gather business requirements, perform data analysis, and present findings that drive decisions in engineering, production, and customer service.

****Responsibilities:****

- Analyze large volumes of structured and unstructured data.
- Create dashboards and visualizations to track KPIs.
- Work with engineering and supply chain teams to support process improvements.
- Build predictive models to forecast future trends.

****Minimum Qualifications:****

- Bachelor's degree in Mathematics, Statistics, Economics, or related field.
- 2+ years of experience in data analytics.
- Proficiency in SQL, Python, and Excel.
- Experience with BI tools (e.g., Tableau, Power BI).

****Preferred Qualifications:****

- Strong storytelling and communication skills.
- Familiarity with machine learning algorithms.
- Experience with cloud data warehouses like BigQuery or Snowflake.
