Job Title: Software Engineer - Python Developer

Company: Google

Location: Mountain View, CA

About the Job:

As a Python Developer at Google, you will design, develop, test, deploy, maintain, and improve software solutions across various teams and products. You'll collaborate with cross-functional teams to build scalable backend services, data pipelines, or machine learning applications.

Responsibilities:

- Write high-quality, testable, and scalable Python code.

- Develop REST APIs and integrate with third-party services.

- Collaborate with front-end engineers and data scientists.

- Maintain CI/CD pipelines and automate routine tasks.

- Participate in code reviews, design discussions, and troubleshooting.

Minimum Qualifications:

- Bachelor's degree in Computer Science or equivalent practical experience.

- 3+ years of experience in Python development.

- Proficiency in Django, Flask, or FastAPI.

- Experience with Git, Linux, and Docker.

Preferred Qualifications:

- Experience in cloud environments like GCP or AWS.

- Familiarity with Kubernetes and microservices architecture.

- Strong problem-solving and debugging skills.
